

Ports, Harbors and Airports

Disaster Prevention and Reduction Measures

Promotion of the Nankai Trough earthquake countermeasures, etc. Tsunami countermeasure at the Shimotsu Port coast (Kainan area) in Wakayama prefecture

In the tsunami inundation prediction area in Kainan City, Wakayama Prefecture, administrative and disaster prevention center functions and manufacturers of high value added products are gathered. For this reason, we are promoting maintenance of coastal conservation facilities for the protection of these facilities as well as human life and property against large-scale earthquakes such as the Nankai Trough earthquake.

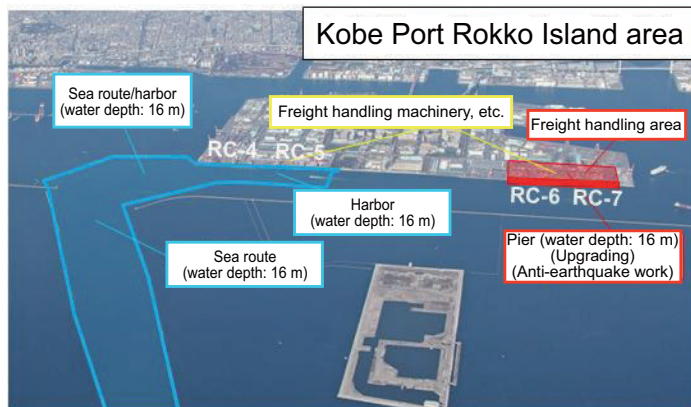

Revitalization of Economy / Region

Function enhancement of international container strategy port "Hanshin Port"

During changes in the situation surrounding shipping and port, including further enlargement of container ships and reorganization of major routes by cooperation among shipping companies, it is aimed that maintaining and expanding the major route to call at our country by deepening and accelerating port policies of international container strategy with non-structural and structural measures in order to strengthen the industrial competitiveness of Japan and to maintain and create national employment and income.

Support menu for competitiveness improvement project of international strategic port

Wide area cargo pick up promotion project	Targeting cargo transported to North America, Europe, etc. from ports other than international strategic ports, projects aimed at switching the use of major route departing from and arriving at the international strategic port.
Project to attract new major routes	Project to realize new port calls etc. of the major routes to international strategic ports
Traffic congestion measures business	Project to mitigate traffic congestion in front of terminal gates at international strategic ports

To enable large vessels operating on major sea routes to enter Kobe Port and Osaka Port, construction of large container terminals with global standard water depth and area is being promoted.

Maintenance

Securing Public Safety and Security

Strengthening the disaster prevention function of government offices and facilities that will serve as a disaster prevention base

Upgrading of government offices and facilities that serve as disaster control bases is being promoted in cooperation with the respective regions (Wakayama Central Government Building).

Project to extend the life of government offices and facilities

Major refurbishment contents of long-life project	
Protection of the building	(Example) Exterior wall, rooftop waterproof, fittings
Preventing degradation of disaster prevention equipment	(Example) Fire extinguishing equipment, fire alarm equipment
Preventing degradation of building lifeline	(Example) Water supply and drainage facility, electric substation facilities

By being able to safely use existing government offices and facilities for a longer period, reduction of total costs, etc. is achieved.

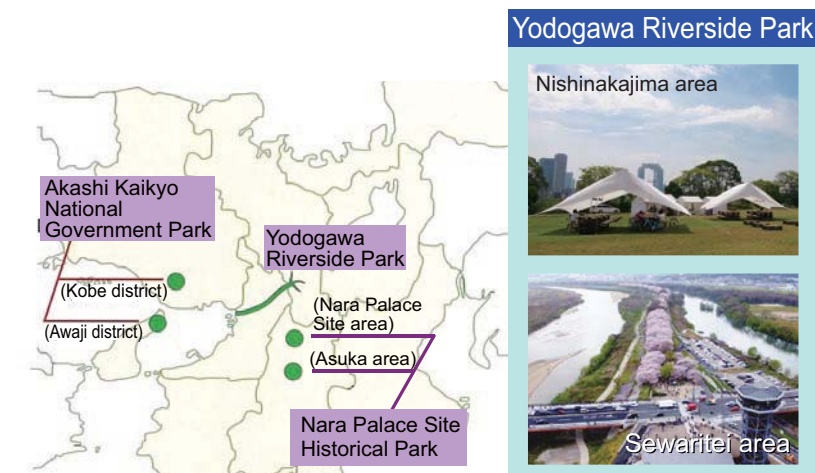

Parks

Realization of Abundant Living

Maintenance promotion of national park

In Kinki area, three national parks are managed.

- To respond to the growing demand for wide area recreation in the Kinki area
 - To protect and grow the rich natural environment
 - To be a place to interact with nature and people
 - Save and utilize historical and cultural heritage
- We strive to manage properly while promoting maintenance so that many people can use it while sharing the role for each park.

Akashi Kaikyo National Government Park

Area around the Kitora Tomb

Regarding the maintenance of the Nara Palace Historical Park (Asuka area)

Regarding the Nara Palace Site area, construction work on the Nara Palace Site Exhibition Pavilion, which will open to the public in spring 2018, and the manufacture, installation, etc. of exhibits will be continued. Restoration work on the South Gate of the First Former Imperial Audience Hall will be launched.
