Ports, Harbors and Airports

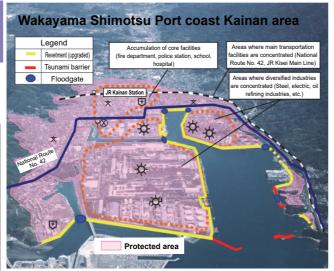

Disaster Prevention and Reduction Measures

Promotion of the Nankai Trough earthquake countermeasures, etc. Tsunami countermeasure at the Shimotsu Port coast (Kainan area) in Wakayama prefecture

In the tsunami inundation prediction area in Kainan City, Wakayama Prefecture, administrative and disaster prevention center functions and manufacturers of high value added products are gathered. For this reason, we are implementing

the improvement of coastal conservation facilities (including raised embankment works) for the protection of these facilities as well as human life and property against large-scale earthquakes, such as the predicted Nankai Trough earthquake.

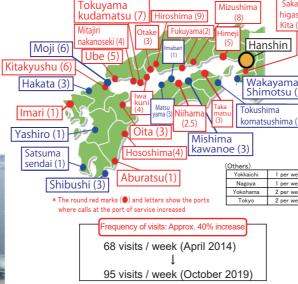

Revitalization of Economy / Region

Function enhancement of international container strategy port "Hanshin Port"

The world of maritime transportation and ports / harbors is undergoing change as shipping companies further reorganize their alliances and narrow down their ports of call, and Al, IoT, and other telecommunications and automation technologies rapidly progress. In this context, Japan is working to both improve its industrial competitiveness as well as maintain and improve employment and incomes for the Japanese people by continuously implementing strategic international container port policy that integrates both "hard" and "soft" elements.

Expansion of the international feeder network by the international strategic harbor competitiveness reinforcement measures

To enable large vessels operating on major sea routes to enter Kobe Port and Osaka Port, construction of large container terminals with global standard water depth and area is being promoted. In the Kobe Port district, the construction and improvement of roads have been undertaken to strengthen the function of transportation of sea cargo.

Public Buildings

Securing Public Safety and Security

*Upgrading of government offices and facilities that serve as disaster control bases is being promoted in cooperation with the respective regions

After disasters such as Nankai Trough giant earthquakes, development of the Osaka sixth district combination government building (tentative name) with the necessary earthquake-resistant performance can go ahead by the PFI method so that government agencies entering work on disaster prevention move into action precisely

- Promotion of the earthquake resistance of government office facilities Nara National Government Building No. 3, earthquake-resistance work
- Promotion of ceiling earthquake proofing measures for government office facilities Hyogo Prefectural Police Academy and Shiga Prefectural Police Academy, ceiling repairs

romotion of future-oriented measures addressing aging infrastructure Deterioration measures for government office facilities

- Extending the life of government building infrastructure Nara National Government Building No. 2. life-extension repairs
- Improvement of the aging deteriorated parts of existing

Toyooka government building, outside wall repairs

Promotion of the use of wood

Based on the Act on Promoting the Use of Legally Harvested Wood, wood has been actively used for newly constructed buildings and the interior design of public facilities, including Kyoto Gyoen Nakadachiuri Rest House, Japan Coast Guard's general training building, and the Wakayama Prefectural Anti-riot Police Squad
